MEL BALANCER

Advanced formula of mixed flakes to balance your grain ration

Density = 540 g/l

Utilisation :

Quantity of balancer per day	Quantity of grain per day
3 liters or 1,6 kg	0,75 to 1,5 kg
4 liters or 2,2 kg	1 to 2 kg
6 liters or 3,2 kg	1,5 to 3 kg

Quantities should be adjusted taking into account the weight, body condition, age, activity level and breed of the horse, in addition to the type, quantity and quality of forage given.

MEL BALANCER is used as a supplement to forage.

We advise to feed at least 1kg hay per 100 kg of the horse's body weight. For a 500 kg horse, this means a daily distribution of 5 kg of hay.

Supplement to forage for horses
